

Script-Controlled ACL – Restrict Record Access Based on Field Value

2. Requirement Analysis

User and Role Requirements

- Create a test user named EEE User.
- Create custom roles bb1, bb2, bb3, and bb4.
- Assign the required roles to the test user.

Table and Field Requirements

- Create the custom table u_institution_details with the label Institution Details.
- Required fields include Student Roll Number, Student Name, Faculty Name, Branch, Email, Phone Number, and Description.
- Branch is a Choice field with ECE, EEE, and CSE values.
- Create multiple records with different branch values.

Access Requirements

- READ access is controlled using bb1 and the EEE branch condition.
- CREATE access requires bb2.
- WRITE access requires bb3.
- DELETE access requires bb4.
- Admin users must retain access regardless of branch.
