

Script-Controlled ACL – Restrict Record Access Based on Field Value

4. Project Planning Phase

Implementation Sequence

- Milestone 1: Create users and roles.
- Milestone 2: Create the custom table and fields.
- Milestone 3: Create and verify the READ ACL.
- Create and verify the CREATE ACL.
- Milestone 5: Create and verify the WRITE ACL.
- Milestone 6: Create and verify the DELETE ACL.
- Milestone 7: Review the overall outcome.

Planned Verification

- Impersonate the EEE user and open the Student Records list.
- Impersonate Admin and open the same list.
- Verify access for users with the required roles.
- Verify that users without the required role cannot access records.
